THE VINTAGE

The benefits of the Gironde estuary

The exceptional terroir of Château Pédesclaux has always benefited from its proximity to the river, which promotes good air flow that dries up the soil and reduces risks of diseases. The river regulates the temperatures and moderates climatic excesses. 2017 is marked, in Bordeaux, by two strong episodes of late frost on the 21-22 and 27-28 of April. But the Château Pédesclaux vineyard was not affected by these harsh temperatures.

2017, a very early vintage

The cold and dry winter allowed for a good vegetative rest of the vine. Starting in the Spring, everything sped up. The warm temperatures caused an early budding, then a fast and homogeneous blooming, 10 days before usual. That fast pace kept going during the summer: it was dry and cloudy with cool nights, which protected the fruits and acidity of our grapes.

Early harvest from the 18th to the 29th September

The 12 days harvest went smoothly and ended on the 29th of September

Once the fermentation process was complete, our first impression was very promising. Our 4 grape varieties showed very different expressions, with a lot of personality.

The Cabernets-Sauvignons are incredibly refined.

The Merlots are very tense, with a very strong expression of fresh fruit.

The Cabernets Francs are the best that were ever harvested on the property. Moist, dense and airy, they have all the qualities to make a delightful wine.

The Petit Verdot turn up with their characterized spicy expression.
